REMARKS

In accordance with the foregoing, claim 18 is amended to improve compliance of the recitations of claim 18 with the supporting disclosure in the specification of the subject application. No new matter is presented and, accordingly, approval and entry of the amended claim 18 is respectfully requested.

SUPPLEMENTING THE RESPONSE TO THE REJECTION OF CLAIM 18 IN ITEM 3 OF THE OFFICE ACTION MAILED FEBRUARY 23, 2007

Initially, and as noted above, amended claim 18 is submitted to be in full compliance with the supporting disclosure of the specification. Particularly, the amendatory recitations of "first and second resistance layers" respectively correspond to resistance layers 43 and 49 in FIGS. 8A and 8B, and "a film" corresponds to film 1.

Further to the traverse of the rejection of claim 18 in the response filed May 23, 2007 at pages 10-11, Applicants point out that Asano fails to teach or suggest a Yagi-Uda antenna antennal comprising transparent electrodes formed on a film having a first surface on which the first resistance layer is provided and having a second surface on which the second resistance layer is provided. The antennas taught by Asano do not have the structure of the present invention as defined in amended claim 18.

CONCLUSION

There being no further outstanding objections or rejections, it is submitted that the application is in condition for allowance. An early action to that effect is courteously solicited.

Finally, if there are any formal matters remaining after this response, the Examiner is requested to telephone the undersigned to attend to these matters.

Docket No.: 1713.1011 Serial No. 10,765,878

If there are any additional fees associated with filing of this Amendment, please charge the same to our Deposit Account No. 19-3935.

Respectfully submitted,
